

TRUCK BUS RADIAL

TIRE PROGRAM

FOR COMDATA/FUELMAN FUEL CARD CLIENTS

I. PURPOSE

Facilitate the retail sale and delivery of eligible Bridgestone products to Comdata/Fuelman fuel card clients.

II. EFFECTIVE DATE

Updated October 1, 2022

III. ELIGIBLE PRODUCTS

See accompanying net price list

IV. PARTICIPANTS

Dealers: All authorized & participating Bridgestone commercial dealers.

Customers: All verifiable Comdata/Fuelman fuel card clients.

V. BRIDGESTONE DELIVERY / SERVICE PROCEDURE

Comdata/Fuelman fuel card client contacts Bridgestone Commercial Dealer to:

- 1. Confirm participation in the program.
- 2. Determine product availability / inventory.
- 3. Schedule appointment for replacement service.

Dealer Agrees to Provide:

- 1. Product at the price listed in the current net price sheet.
- 2. Any agreed upon services between dealer & Comdata/Fuelman fuel card client (dealer discretion).

At Time of Service Comdata/Fuelman fuel card client Provides:

- 1. Proof of program eligibility / identification Comdata Fleet Account Number (AA123).
- 2. Method of payment (cash, credit card, etc.).

At time of service Comdata/Fuelman fuel card client MUST pay for all products and services at the time of delivery. Comdata/Fuelman fuel card client transaction cannot be processed as National Fleet transactions.

Bridgestone reserves the right to modify or discontinue this program at any time.

NET PRICE BOOK - CONFIDENTIAL

Pricing for select Bridgestone & Firestone products to Comdata/Fuelman fuel card clients.

• = Discontinued Product

DRIVE ON THE MOST TRUSTED BRANDS

We know that the challenges commercial customers face vary widely with no two businesses having the exact same tire needs. That's why we offer a robust portfolio of tires and retreads that spans across industries, applications and product tiers. Every product we manufacture is engineered for superior performance in the role it was developed for.

BRIDGESTONE

Best-in-class performance, engineered with the latest advancements in compound technology and tread innovation. Bridgestone tires are developed with leading fleets in mind and deliver excellent performance in the moments where it matters most.

Firestone

Built with the dependability and durability you need to get the job done right on time, no matter what. With a dedication to providing confident quality over the long haul, Firestone tires are built to work as hard as you do.

bandag

The most popular tire brand on the road, new or retread, Bandag is continually setting the bar higher for retread reliability, sustainability & fleet savings. Plus, when paired with Bridgestone & Firestone's industry-leading casings, Bandag retreads deliver performance equal to competitive new products.

LET US DO THE HEAVY LIFTING

We know tires and how best to manage them. Our experts can recommend and provide the best product and service options for your fleet: it's what they are trained to do. So whether suggesting a tire specifically for your unique fleet application or delivering custom service programs, our goal is the same - help you maximize performance and return on investment so you can focus on your core business.

DATA YOU CAN USE

Tires are just one piece of a comprehensive tire program. Bridgestone continues to innovate to provide the data you need to make the right decisions about your fleet. Tools such as Toolbox and BASys uncover trend data to help steer you to the best products and processes for your unique fleet needs. Doing business with Bridgestone opens the door to an ecosystem of fleet management solutions that connect your tires and tire performance data with fleet management platforms and predictive maintenance tools.

WE'RE ALWAYS THERE IN AN EMERGENCY

Emergency Roadside Service isn't a 9-5 business. Whenever you need to call, we'll be available when your fleet needs us. With more than 2,500 authorized dealers and truck stops, you're backed by one of the best and broadest networks in North America.

Call: 1-800-560-0099

Online Request Form: BridgestoneCallCenter.Service-Request.Reach24.net/

HOW TO LOWER YOUR FLEET COSTS WITH RETREAD TIRES

Choosing retreads is about protecting your bottom line while understanding the bigger picture. There are cost savings for you, economic benefits for the whole industry and energy savings for the whole planet.

COST-SAVINGS

It's simple math, really. Retreads cost less than comparable new tires, saving fleets big money on their third highest expense item after labor and fuel.

WEAR LIKE NEW TIRES

Advanced compounding and tread designs enable retreads to deliver wear-out mileage comparable to - and in some cases better than - new tires. In fact, a recent test in a waste fleet, one of trucking's toughest applications resulted in Bandag's BRM3 retread handily outwearing premium new tires: the Goodyear Endurance WHA and Michelin XZUS22.

FUEL EFFICIENCY

Did you know that retreads are some of the most fuel-efficient tires available on the market today? In fact, out of 362 new and retreaded tires evaluated for rolling resistance, Bandag's FuelTech retreads were among the top 10% in rolling resistance of all tires tested³.

A retreaded tire can be just as fuel efficient, or even better, than a new tire.

RELIABILITY

Contrary to commonly held beliefs, studies have shown that retread tires offer reliability comparable to new tires. This is confirmed by several studies conducted over the last two decades, which all come to the same conclusion as the National Highway Traffic Safety Administration (NHTSA):

...retreaded tires are not inherently more prone to failure than new tires."

-John Woodrooffe, Director, Transportation Vehicle Safety Analytics at University of Michigan.

WARRANTIES INCLUDE RETREADS

Quality new tires are engineered to be retreaded, and, in fact, most warranty their casings for multiple retreads for multiple years. The initial investment in a casing pays dividends each time it delivers another tire life through retreading.

N-Speed Rated

N speed rated products are rated at highway speeds up to 87 MPH, and it's important to put the proper tires on the vehicle based on driving conditions. In some parts of the country, highway speeds are greater than 70 mph. Choosing a tire with an equal or greater speed rating than the original equipment tire is generally recommended.

R238

Distribution and P&D, Bus & Coach

An all-position radial tire that stands up to the harshness of severe, high scrub environments in regional pickup and delivery applications.
